

Inspire Corporate Bond ETF invests in the investment grade bonds of inspiring, biblically aligned large companies in the United States. IBD is managed according to biblically responsible investing standards seeking to create meaningful impact in the world and help investors align their investments to support biblical values. The Inspire Corporate Bond ETF seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Inspire Corporate Bond Impact Equal Weight Index.

The Inspire Impact Score is an objective, rules-based scoring system which Inspire uses to identify what we believe to be some of the most inspiring, biblically aligned companies to invest in – the kind of companies that are blessings to their communities, customers, workforce and the world. The Inspire Impact Score rates a company on a scale of -100 to +100 in relation to how well the company aligns with biblical values, with +100 being the highest possible score.<sup>1</sup>

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting [www.inspireETF.com](http://www.inspireETF.com). Market Price returns are based upon the official closing price on the listing exchange (NYSE ARCA) at 4:00 p.m. ET when NAV is normally determined for most Inspire Funds, and do not represent the returns you would receive if you traded shares at other times.

### WHY IBD?

#### U.S. INVESTMENT GRADE CORPORATE BONDS

IBD provides broad exposure to higher credit quality, investment grade fixed income securities issued by "blue chip" large cap companies in the U.S.

#### INTERMEDIATE DURATION

IBD's intermediate-term composition is designed to be a core fixed income holding and function as the workhorse of fixed income portfolios.

#### BIBLICALLY RESPONSIBLE INVESTING

IBD uses the Inspire Impact Score methodology to seek out investments in the most inspiring, biblically aligned companies, applying a faith-based perspective in seeking out businesses that are a blessing to their customers, communities, workforce, and the world.

<sup>1</sup>How the Inspire Impact Score is calculated – Step 1: Every company starts with zero points. Step 2: Exclusionary screens are applied to companies which operate at odds with biblical values. Negative points are assigned to the impact score if any violations are found. These companies are always excluded from investment. Step 3: Companies with no negative violations are then positively scored based on how they operate as blessings to their customers, communities, workforce and the world through the five Sustainability Accounting Standards Board (SASB) categories: environment, social capital, human capital, business model & innovation, and leadership & governance (you can learn more about the SASB categories at [materiality.sasb.org](http://materiality.sasb.org)). Positive points are assigned based on the extent to which the company has above average scores in those positive categories. Result: Companies are scored on a scale between -100 and +100, with scores above zero representing better alignment with biblical values. Inspire only invests in companies with scores of zero or higher, and particularly selects those companies with scores closest to 100 for inclusion in portfolios.

<sup>2</sup>SEC Yield calculations are based on most recent Ex-Date. SEC Yield may include income, dividends, return of capital, or other distributions that are not considered short-term or long-term capital gains. Return of capital is considered a return of the investment principal and is not derived from net profits. Yield performance shown is subsidized and reflects fee waivers and/or expense reimbursements by the investment advisor.

### Important Risk Information

The Fund invests its assets in securities with an Inspire Impact Score® of zero or higher. Funds with a higher score are considered to be biblically responsible companies. As a result of its strategy, the Fund's exclusion of securities of certain issuers for nonfinancial reasons may cause the Fund to forgo some market opportunities available to funds that do not use these criteria. When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund.

Equity securities may fluctuate in value in response to the activities of individual companies and general market and economic conditions. While the shares of ETFs are tradable on secondary markets, they may not readily trade in all market conditions and may trade at significant discounts in periods of market stress. ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns. There is no guarantee that the Fund will achieve its objective. Securities in the Index or in the Fund's portfolio may underperform in comparison to the general securities markets or other asset classes.
