Past net performance is no guarantee of future results. Investors cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charges. Cumulative performance is the total holding period rate of return of an investment from the start date to the current report date. Annualized performance is the return an investment provides over a period of time, expressed as a time-weighted annual percentage for periods shorter and longer than 1 year. The U.S. Dollar is the currency used to express performance. Annualized Volatility is a statistical measure of the dispersion of returns for a given security measured by using the standard deviation between the daily returns from that same security and expressed as an annual average. Commonly, the higher the volatility, the riskier the security. The Sharper ratio is the average annual return earned in excess of the risk-free rate (i.e., 1 year LIBOR) per unit of volatility as measured by the annualized standard deviation. Maximum drawdown (MDD) is the maximum loss from a peak to a trough of a portfolio, before a new peak is attained. The MSCI World Index is a broad global equity index that represents large and mid-cap equity performance across 23 developed markets countries. Inspire claims compliance with the Global Investment Parformance Standards (GIPS® is a composite descriptions please email your request to inspire@inspireinvesting.com. Composite and benchmark/index performance results reflect realized and unrealized appreciation and the reinvestment of dividends, interest, and/or capital gains. Taxes have no theen deducted. Gross composite returns do not reflect the deduction of an investment advisory fee but do not reflect the deduction of any fees or expenses. Such fees that a client may incur in the management of their investment advisory account may reduce the client's return. The "ret of fees" performance figures reflect the deduction of an investment advisory fee but do not reflect the deduction of an investment advisory fe
